IV. ASSESSMENT OF THE INTERNAL CONTROL SYSTEM AND SIGNIFICANT RISK MANAGEMENT SYSTEM

On the basis of the analysis of the financial statements of the Company and the Capital Group for 2014, the Management Board's report for 2014, the Management Board's consolidated report on the operations of the Capital Group for 2014 and the ongoing cooperation with the Company's Management Board, the Supervisory Board, which at the same time performs the tasks of the audit committee, concludes that the Company's Management Board is fully responsible for the functioning of the internal control system and significant risk management system. In the process of current management and direction of the Company, and also in the phase of preparing periodical reports, the Management Board performs a periodical verification of risk factors significant for the Company on an ongoing basis throughout the whole financial year.

The Company's Management Board is also responsible for the efficiency of the internal control system in the process of preparing financial statements. The Management Board represented by the Management Board Member responsible for financial matters directly supervises the process of preparing the contents of the Company's financial statements and interim reports. The integrated IT system SAP R/3 functioning at the Company, the V-desk system which covers registration, factual description, posting and acceptance of invoices – in line with competences assigned by the Management Board, and the accounting policy approved by the Company's Management Board and based on International Accounting Standards allow for and ensure the correct functioning of internal control of

every operation with financial implications for the Company.

Within the internal control system, the Company has developed detailed planning, budgeting and management analytics processes which allow for:

- detailed planning of costs for each cost centre, isolated from the Company's structure,
- monthly settlement of actually incurred costs and constant analysis of deviations,
- monthly control of budget execution for individual cost centres together with monthly verification of the levels of controlling indicators divided into
- profit centres, products and sales areas, reported by the Controlling Department to the Management Board and indirectly to the Company's Supervisory Board, and hedging the exchange rate risk,
- assessing all investment applications in view of the estimated rate of return of a given investment.

The internal control system and significant risk management system function also on the basis of:

- a clear and documented division of powers and responsibilities adopted in the internal acts of the Company,
- provisions of law regarding the products and scope of operations of the Company,
- a set of internal regulations, procedures and instructions,
- work quality control performed by directors of individual organisational units,
- product quality control reported cyclically to the Company's Management Board,
- inspections of threats and risk on individual work stations,
- reviews of the management system in organisational areas and processes,
- external and internal audits.

The Company implemented a new investment procedure the main purpose of which is to enable supervision of full control over each stage of planning and realization of investments. The current analysis of investment processes ensures a reliable financial, materials and asset-related information. It allows thus to identify potential errors, deviations or any other irregularities during realization of particular stages of investment thanks to what it is possible to input the necessary corrections related to investment processes and especially their correct and thorough settlement.

The abovementioned procedures of internal control and the significant risk management system are viewed by the Supervisory Board as coherent, stable and efficient tools which allow to significantly limit risks related to current operations. The Company is aware of the risk related to the conducted activity and has implemented control mechanisms which enable it to manage risk and keep it at acceptable levels, both in production divisions and in other fields of activity. The Supervisory Board

expresses a positive view of the internal control system and significant risk management system functioning at the Company in 2014, and concludes that their functioning limits the main risks in the Company's operations.

In the opinion of the Supervisory Board, the Company's situation is stable. The Supervisory Board does not see any real threats to the functioning of the Company, and the financial results achieved for 2014 should be considered satisfactory.

V. ASSESSMENT OF THE ACTIVITIES OF THE SUPERVISORY BOARD IN 2014

The Supervisory Board conscientiously fulfilled the tasks of a specialised body exerting control over the management of the Company on behalf of the shareholders. The Supervisory Board is composed of individuals with vast experience and professionalism, who possess the potential which allows to analyse the information received from the Company. Also the participation of independent Members of the Supervisory Board in the activities was a guarantee of using objective assessment criteria for issues submitted for analysis by the Board.

The Supervisory Board, as a group of experts, also performed advisory functions to the Management Board, contributing their knowledge and experience and offering support in the decisions made.

The Supervisory Board reliably and efficiently supervised the actions of the Management Board and expresses a positive view of its activities in the financial year 2014, also with regard to the correct functioning of the internal control system and significant risk management system.
